

Mwaafrika works
—DESIGN WORK IN YOUR STYLE—

Mwaafrika Works

This is the company portfolio to review most of the work done from the period we started in 2017 to current time. We have been involved in the design works as shown.

Preface

In the past eight years, under the guidance of the clients, we managed to work a number of projects from web design and majority of graphic designs. Now that I worked a number of jobs, I can confidently show the number of projects I am allowed to show (some had NDAs involved).

At MWAAFRICA, we transform ideas into visually compelling digital experiences. Specializing in both graphic, and web design, our team blends creativity with technical expertise to craft designs that not only look stunning but also function seamlessly across all platforms. Whether you're looking for a sleek website that captures your brand's essence or custom graphics that make your marketing materials stand out, we have the skills to bring your vision to life.

Our approach is collaborative and client-focused, ensuring that each project reflects your unique identity and goals. From responsive web design that adapts beautifully to any device to eye-catching logos and branding materials, we deliver high-quality, professional results. With a keen eye for detail and a commitment to staying ahead of design trends, we create work that leaves a lasting impression and drives engagement. Let us help you elevate your brand and connect with your audience through the power of great design.

Most of my works are reflections of life. Emphasizing the connotation of the picture is the key to humanized film. As we all know, smile is the magic weapon of commercial service, the theme of happy life, and the symbol of social harmony.

Part 1: Logos

LOGO DESIGN.

I am sharing only the logos that I am confident in and have no issues with. The level of design varies based on the client's preferences, offering a wide range of options. These options differ in simplicity, dimensionality, color palettes, filler elements, and various shapes and patterns. We can also incorporate artworks as logos, depending on the client's needs.

GRAPHIC DESIGN.

For websites, clients may require filler content to enhance the visual appeal of their site. While AI can assist with this, most prefer that we source images from African landscapes and architecture to incorporate into their designs. These images typically include landscape and building photography, with a focus on a specified color palette.

PART 2: Website design

Using Python for website coding, particularly with frameworks like Django or Flask, allows for the creation of dynamic and responsive user interfaces. Python can enhance user experience by integrating seamless backend functionality with modern frontend frameworks, enabling features like real-time updates, interactive dashboards, and personalized content delivery.

By leveraging libraries such as Bootstrap for responsive design or incorporating JavaScript for dynamic elements, Python developers can build user-friendly websites that are both functional and visually appealing. Additionally, Python's versatility supports the integration of AI and machine learning, offering innovative ways to engage users through personalized and adaptive interfaces.

```
function StoreInventory() {
    // Initial state for item count
    const [itemCount, setItemCount] = useState(10); // Assuming initial stock is 10

    // Function to handle buying an item
    const buyItem = () => {
        if (itemCount > 0) {
            setItemCount(itemCount - 1);
        } else {
            alert('Item out of stock!');
        }
    }

    return (
        <div>
            <p>Current Stock: {itemCount}</p>
            <button onClick={buyItem}>Buy Item</button>
        </div>
    );
}

// Import statements
import sys
sys.path.insert(0, './app')

import time
import config
from datetime import timedelta, date
from BinanceAPI import BinanceAPI

class Binance:

    def __init__(self):
        self.client = BinanceAPI(config.api_key, config.api_secret)

    def balances(self):
        balances = self.client.get_account()

        for balance in balances['balances']:
            if float(balance['locked']) > 0 or float(balance['free']) > 0:
                print('%s: %s' % (balance['asset'], balance['free']))

    def balance(self, asset='BTC'):
        balances = self.client.get_account()
        balances['balances'] = {item['asset']: item for item in balances['balances']}
        print(balances['balances'][asset]['free'])

    def orders(self, symbol, limit):
        orders = self.client.get_open_orders(symbol, limit)
        print(orders)

    def tickers(self):
```

Clients may require specialized content where they will need specific needs achieved through a specific programming language. This helps us get more staff trained for the work at hand. New languages such as React and Django do require a skillset that the Python or Vim programmer employs.

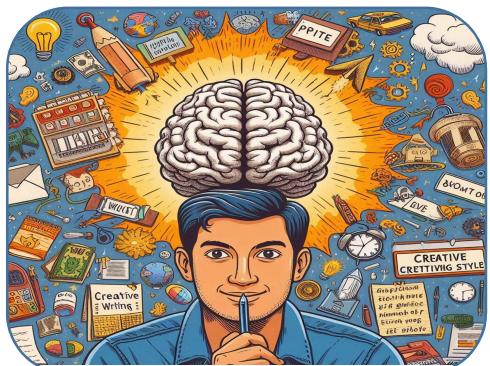

AI art for websites

These pictures are used in web design as filler pictures or in documentations when trying to explain ideas and concepts.

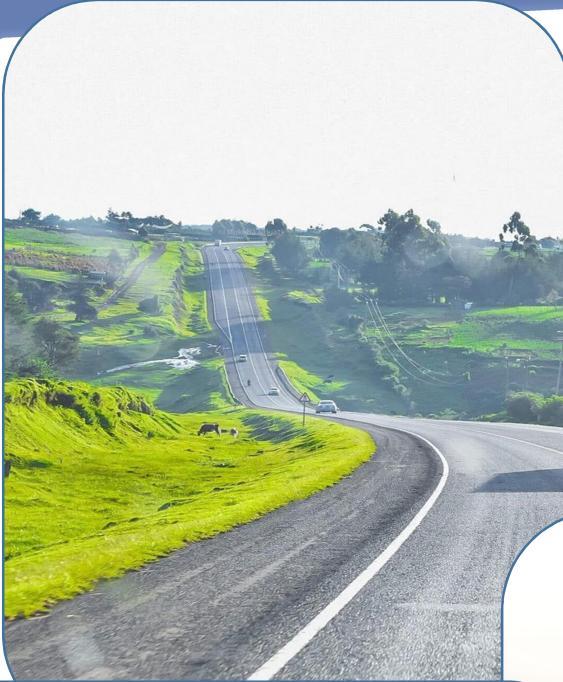

Advert projects

Some ad work need abstract pictures and getting the correct ones that satisfy the needs of the client, is our top priority.

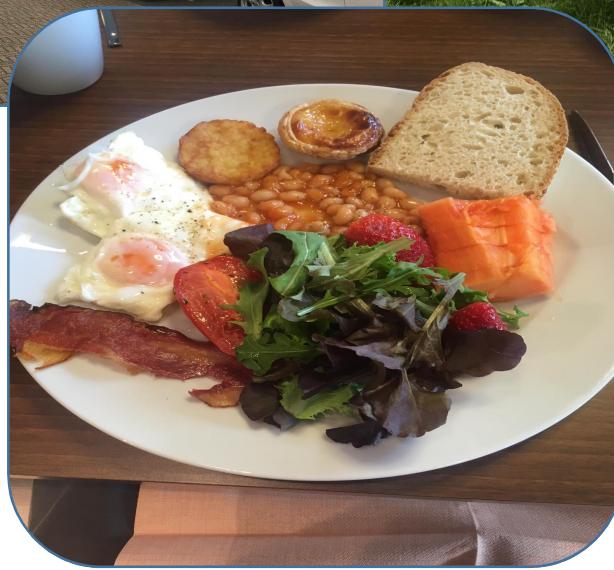

PART 3: Photography work

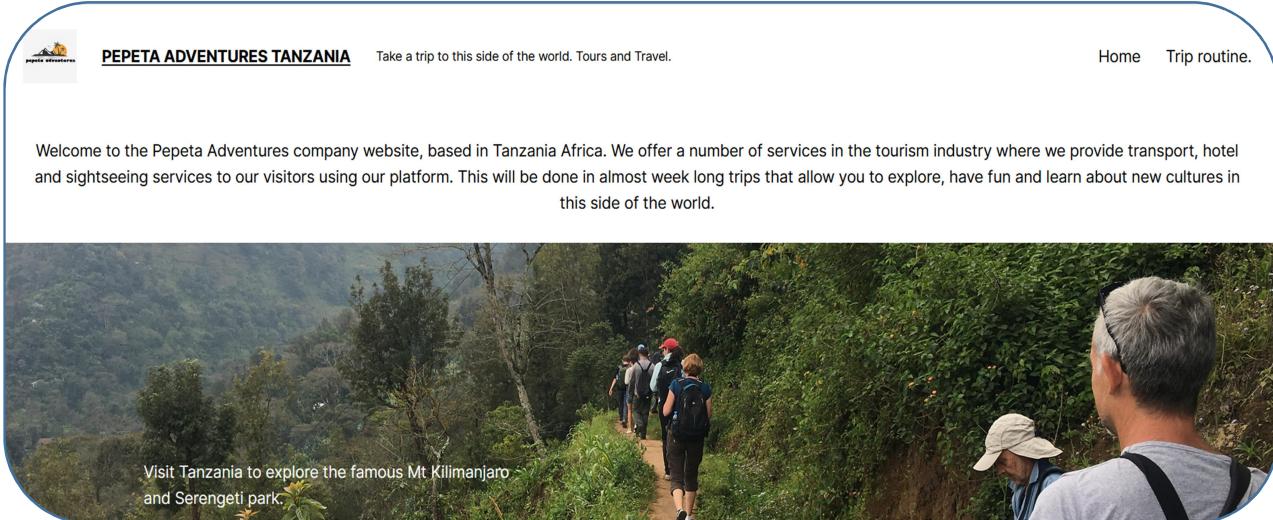

To those who prefer to use photos, we tend to go source them to your liking. This will be the other category. This point there will be photography for websites, or news media depending on the needs of the client.

This is however, client driven as our own pictures have only been used for our own promotional media.

Sample of websites I am allowed to show are as shown

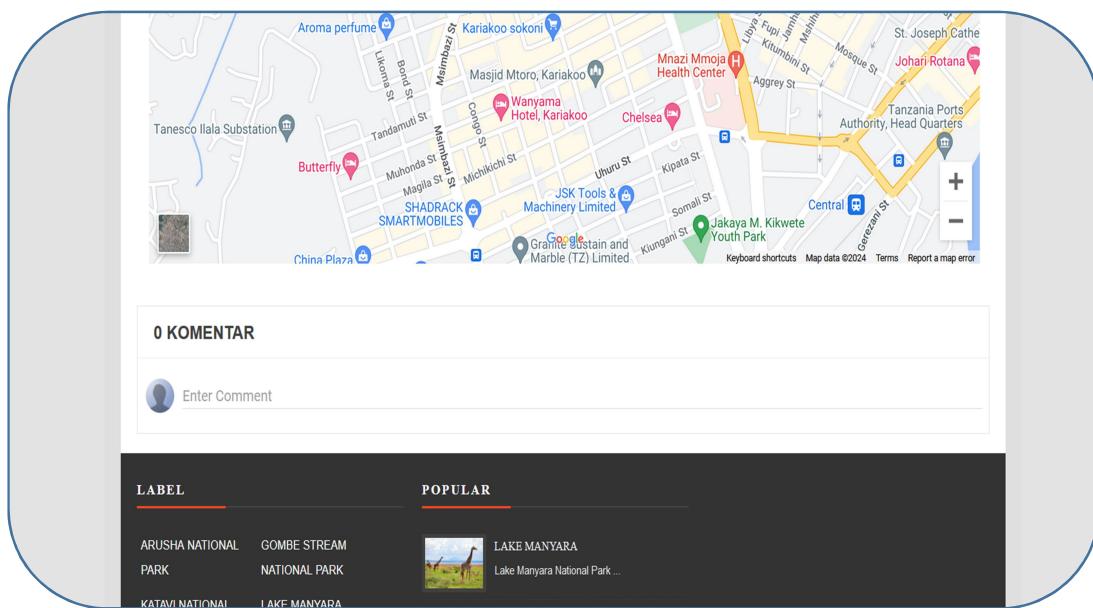

PEPETA ADVENTURES TANZANIA Take a trip to this side of the world. Tours and Travel.

Welcome to the Pepeta Adventures company website, based in Tanzania Africa. We offer a number of services in the tourism industry where we provide transport, hotel and sightseeing services to our visitors using our platform. This will be done in almost week long trips that allow you to explore, have fun and learn about new cultures in this side of the world.

Visit Tanzania to explore the famous Mt Kilimanjaro and Serengeti park.

Travel website for tourists to tanzania

A map of Arusha, Tanzania, showing various landmarks and streets. Key locations labeled include: Aroma perfume, Kariakoo sokoni, Masjid Mtoro, Kariakoo, Wanyama Hotel, Kariakoo, Chelsea, Mnazi Mmoja Health Center, Johari Rotana, Tanzania Ports Authority, Head Quarters, Central, Jakaya M. Kikwete Youth Park, and several streets like Likoma St, Bond St, Misimbaza St, Tandamatu St, Congo St, Michikichi St, Uhuru St, Kipata St, Somali St, Kiungani St, Aggrey St, Lipy St, Pupu St, Kitumbini St, Jumili St, Mosque St, and Gereza St. A yellow polygon highlights a specific area around the Central business district. A legend at the bottom left shows categories: LABEL (ARUSHA NATIONAL PARK, KATAVI NATIONAL PARK, GOMBE STREAM NATIONAL PARK, LAKE MANYARA) and POPULAR (LAKE MANYARA).
